IN NEW YORK.

There is a real scare among the administration a followers in New York. The New York Herald or last. Monday shows remark signs of this perturbation. Its leading editorial begins thus

is this momentous transcendent issue—noolying, as in Blaine observed the other day, the government of the Inton for a quarter of a conture—this election of the president to be fool tawn) in a local issue. Must the purpose if a mational party and the density interests of even monwealths be put early a norm gara of poll Melans are high in temper over a few offices, the right to clean stree a pu cat fi ex hang murder

Proceeding with its hysterical inquiries the Herold asks further

From a l of which we inter that the omens in New York are not pleasing to the detuo-cratic scoth savers. Questions like the above may be asked in furthernd manner. but the fact is that the prizes for which the democratic factions are contending a New York the may rally the numeral a commissions the jobs is making and cleaning streets in controlling the water, hire police and published kide artments, in working the sheriff's coreners and district attorney a offices at two on in all of which are the richest position is posly in the United States are of immensely more importance to the leaders of the various factions in the metrop ohs than the presidence and all that the predency can brung them. It would be a right sou-consequence naturally flowing from the character of the democratic party to lose the presidency in the contentions over these soons From all signs and sources it be comes evident that the republican prospects in the empire state are regarded on all sides as growing better, and it is not improbable that the herce war of the democratic factions in the city has much to do with this change A special from New York (Oct 9) to the St Paul Pioneer Frees gives this

A few weeks ago there were many democrats A few weeks ago there were many democratic anxious to wager their money on the election of Mr Cloveland. Now it is difficult to find one who will but so in money that Cleveland at 1 to elected 1 3 x Senator Daggert had to-night 100 000 that he offered to bet on Harrison scheeton. He offered to stake it against \$50,000, and on get ting no takers added a present of \$5000 to any one who will take the wager. Many republicans are offer furgismall bets from \$500 to \$5000 that Harrison will be elected.

Bettug or offering to bet is by 10 means a conclusive argument, and it is objection able for many good reasons. Men in laying able for many good reasons. Men in laying wagers are very likely to be warped by their hopes and wishes, and yet this is not lift gether the east since those who would not off nor accept wagers on Harrison it than be ginning of the ampaign except at large odds now or off ring field, while tho a who were caper to beton Chrysland, at the beginning and offered heavy olds are not less reasons. beginning and offered heavy odd- are now by no means to forward. An interpretation this change may or may not be found in the reasons that unpire atterances like too c the Headd and yet the observer is not likely to miss here what he cannot but re gard as a relation between effect, in Lemis, Aga a it is known that the republic in na

### THE BUSHINGTON STATUE

New York city has statues of Franklin, Hamilton Washington Bryant Lincoln, Liftyctic Ltz Greene Hillerk Samuel F orse Con Worth, Caribuldi, Walter Mizzini Burns Tom Moore Humboldt Shake-peure Schiller Seward Parra gut and Irving but it has none of Horace Greelev or Gen Grant This list shows by its omissions how capt crops is public tiste in the matter of public statues- : capricious ness not remarkable in a city that once nor rowly escaped erecting a bronze statue to Tweed during his lifetime after the custom of the Roman emperors who always man aged to order statues erected and medals struck to their honor. There is one Ameri-can statesm in however, whose pre eminance is so universally felt and acknowledged that none or our great cities are without his statue his bust or monument, v. z., Washing ton and we are glad to note that a national association has been formed for the jurpose of rushing sufficient funds to present France with a bigaze statue of Washington in grateful approximation of the gritfrom brance to America in 1876 of the statue of Lafayette, placed in Union square New York city

lake the association that was organized tears ago for the purchase of Mount Ver-non this association includes an organiza-tion of American women composed mainly for the present of the wayes of members of the calmet the senth and house of representatives and other officers of the government representing the different states, to whom substriptions in whe sent. A list of these ladies was published in l'in Standar

Just look at the projection. The democrate tariff in pais wo learn the free lest vet continues | prefection at the rate of 40 per cent to the manufacturer. Is the former to be benefited by free trade in wool and from the continue and the rate of 40 per tection of woolens? Is cheapeness the object? Then since the duty is to be be taken from wool to make goods cheaper why not take the duty from woolens and make the equalize this beneficent system of tariff formand not compel the farmer to tarry it all?

What is the object of that 40 per cent protection which the manufacturer is all! Ohave? Is it for his benefit? Then a it permitted to each and the farmer to tarry it all it is the object of that 40 per cent protection which the manufacturer is all! Ohave? Is it for his benefit? ### THE HOME STRETCH

Three weeks from to morrow the \u00e4mu-1 an people will elect a succes or to I re ident Clevel and by the present outlook it in it well be doubted whether he is to be his own successor. At Washi igton and New York which are the great nerve centers of 10 ht cil knowledge the republic was are full of comb dence while the democrats begin to look tired. Gov Gray of Indiana in his recent yisit to Washington called at the White house and to'd the president that it was more than likely that if the democrats surcorded with their in ition if ticket it would be without the wote of Indiana Alia service on the stump has convinced him that the tirill attitude of the democracy is unpopular in both the farming and manufacturing sections of the state, and that the fact that a tizen of Indiana beads the republican tick et helps it. The president has also been in formed that there was no hope of the de-mocracy earrying Minnesola or Mich gan much less Wisconsin or Illimois, that the only fighting chance for victory was in New York, New Jersey and connecticut. The only western democrats who continue to promise Cleveland democratic victories in the northwest are the stumping statesmen of the cibinet Vilas and Don Dickinson. Ix Senator Camden of West Virginia a denic craf is reported to have said that he did not see how the democrats could expect to carry his stite this year

The democratic hope centers on New York, New Jersey and Connecting If Cleveland carried all these states and lost Indiana and West Virginia he would still lose the day Scenaro Hawley is confident that Connecticut is securely republic in on the present beniff resue Secretary Whitney, who knows new York city politics very well, ten days ago expressed the fear that the drift in the Empire state was steadily against Clevelant. The presence of Judge Thurman on the demogratic ticket has proved a source of weakness instead of strength. His speeches have fallen flat and the nonangers of the campagn are not any rous to exhibit him again before the country. This is very mortifying to Cleveland who is personally responsible for the nomination of Thurman. Gov. Gray was vamily urged. is personally respon the for the nonunation of Thurman too tray was vaint urged upon Cleveland as a man who would have strengthened the taket in Indiana where it was in sore need of help. The original democratic claim of 75 000 majority for Clevel ind in New York c ty has been greatly modified, and the republicans believe that it can be kept down to 40,000 or even less in which ent the state will be easily republican as than 80 000 mappity. The light is close but as matters stand to day it looks as if the republic us had the advantage. There are club organ zurons in New York and Brooklyn. composed of protection democrats and nearly or quite as large an Irish American vote it is estimated will be thrown for H ir tison as wis east for B ame. The Clevel and democracy distinct the loyalty of the 1 am mint faction believing that it will trade right and left to secure which it wints. Thus many would rather have the manor and sheriff their Clevel and for president. The many has received little at the hands of the secure of th

John I Silhivan h sturned einter. The dispatches say he is to be the sporting edito of the New York Plus touted Acus. This is more astounding than if he had turned preacher since it is much easier suddenly to become a princher than in editor. Besilis more prize tighters ministrel reformers and the like take to the pulpit than to the press

But Mr Thurman his written a letter of acceptance after all the poor old man wis very tired and would have preferred to avoid the task but the democracy needed some more compagn literature and the ancient Roman's Ushmasters would not let him rest Bosides, the bandana was setting after mnocaous desustude.

The fourth crop of strawberries for this year has been gathered in the Walla Walla apple trees their second crop and the second crop of numerous other fruits is reported. Where else than on the Pacific coast, in the United States do such things occur?

Another evidence of the great increase of population in Oregon lies in Prof. McElroy 3 report, which shows that there are between 3500 and 4000 more children of rebool age n the state this year than last, which is ac counted for largely by immigration Pending the settlement of the question as to whether under free trade Great Britain as to invade the United States with a crushing quantity of cuty free goods that government

If the leading newspapers of the West ha

not seen this from the start they would not have succeeded in holding their own so com pletely against the great metropolitan paper of the East. The leading Western journal ists were in the beginning in advance of their constituency, but they acted wisely in this just as a broad minded city council when it organ zers a system of neter supply. Iranes it on a basis that is equal not only to the needs of a city now but to its needs ten or twenty je its from date and constraints on a scale that is easily napable of indefinite ex-pansion. The Wester i journalist first of all spared no pains to give the new and all the news both at home and abroad. Next be supplied such intelligent explanation and reflection as the nature and importance of his news demanded, then be made room for the discussion of broad questions of human interest and social morality that are of con-sequence to every reduced community whether in Europe or America and tistly he supplied the taste for miscellineous inform is and state were growing with wonderful rap-idity and that he only way to keep up with the people was to be always a little ahead of their present wants and tastes aware that they would soon grow to want to day what they laughed at or despised yesterd in And because of this foresight the great news papers of the West are to day fully equal in versalile know edge to the best papers of the Harrison will reach the city with not its than 80 000 majority. It will gain in theroogliness, accu-tices and orders a best information and racy and olidity of both information and thought, its present legitim the departments will be expanded rather than reduced and its class blendsh—its disposition to ministrate the petty provincial reliab for bitter and vulgar person dities and feverish description of the c and crime—will gradually pass away. The record of the courts will be told with the classes and truth those af a good military. cle wness and truthfulness of a good military report the gos-up and obscene scandals of the endewilk will not be served up as a piquant salad for proment minded readers file newpaper will be more highly prized than it is to-day by the family the mechanic, the business man and the tourist It will give more attention to the things that make for a sound, ener getic and industrions civilization than it will to the daily chronicle of the victs-itudes of baseball or the checkered career of the iron handed lunk headed heroes of the priz-ring. It will do this because an enlightened public opinion will sanction by its support the effort to do it. This will be the scope and character of the great newspaper of the fu-ture. To those who are skephenl of the better future of the new-paper we point to the Boston Heraid To-day it is the largest, richest, ablest and cleanest paper at the East, though twenty-five years ago its notice court reports were conspectous for vulgarity; and it is this Boston Herald that segaciously says of Western pourner am and its great opportunity, "The Journals that have passed

> If we had the time and space we would write a column on this subject. but as we have not, we wil content ourselves by remarking that to the average lady there is probably no one article possessing more interest in the entire range o'dry goods than a handsome dress fabric. We believe that we have succeeded in placing on our counters the very Cream of Foreign and Domestic Facrics. We made our selections with the utmost care, and are positive that we are showing a larger range of both Novelties and Staples than any house in the line.

New Weaves, Beautiful Designs, Stylish Effects. Handsome Finish, Fine Colorings.

These are some of the qualities we claim for our dress materials. We would also remind you that no dress is complete without suitable trimmings, and we are prepared to supply suitable trimmings for any style of a dress. YOU ARE INVICED TO VISIT OUR STORE.

Owing to the rush for Coaks during the past week, several of our friends were disappointed in not finding the size wanted in some of our garments, as they had already been disposed of. We Telegraphed to our New York House for a fyes's supply, and will be able to meet all demands the coming week, e ther for long or short Wraps.

Nervous exhaustion comes from maintestion o the merves. A noted acientist has discovered that if the abounces, which feeds the nervos, he not fully diseased to the combinence of water is cannot be absorbed by them, hence starvation and axhaustion consequently ting are nourished only in proportion to the ability of the stomach to prepare their tood, which is the most difficult of all the foods to digest, as it must be perfectly dome. Not one atomach in dive can pre pare a sufficient quantity. Bitherto artificial diges into has only been able to digest it fine enough for the blood, which only circulates to the muscless and homes. Three years ago this was overcome, and as now made has corred a large number of cases of paralych and curse the nervous and tired in a few hours. The preparation is sold at the drogging as Moule Nervo Food for 60 cents a quart bottle.

It was now nearly 4 o clock and the people were in a state of expectant. They did not have long to wait for after making a few pretinancy arrangements the professor and a wandering scribe jumped into the baskel and in another moment were wandering heavenward.

Mrs. Van Tassell though fully prepared for the parachate jump did not accompany the balloon. Mr Van Tassell thought that owing to the scarcity of gas, it would be impossible to take her up and that there would be great danger of making a fallure of the accention and parachatle jump. The atmosphere was calm. Not a breve stirred and the balloon went up up, for nearly half a mile without being wafter in any direction. For a few minutes it remained apparently notionless. Then McBride swiped in vain at Parrott's curves and was ont on strikes. McAndries was next to the bat He is accounted a good batter and his friends in the grand stand greeted him with a round of ampliance as he took position. He cut all around the plate in the hope of losing the sphere in the river and was declared out on strikes, then the I set Fortland crowd cheered.

With two out the Baints' chances of varying the tedious nonotony of white washes grew very dim and Straub dashed then to smithet enable; by Platts and McAndries a missed thrown ball by Matthias and Tom larrott's two baggers were productive of two more runs to the Willamettes in their half.

Matthias started the ninth and last by batting short to Buchtel who threw him out at first. Devine followed with a short hit which from Parrott picked up neatly, but what a throw he had to first! Blanchard couldn't have reached it if he had a tennis net stretched above his head. The ball relied down near the fence and Devine ran

around to third base. Platts hit to Tom Perrott who sent the ball back with a jerk. KING KALAKAUA'S REALM. Morgan to nail Devine at the plate, but fleet looted Mormon was too quick Platts stole second and began mapping and was thrown out in shor order Fieucken ended the game by flying out to Balley

His Natural Life to be Presented at New Park Theater-Musical Oemedy Oempany
To-night Mr. Chailes O. Manthury and Miss Nellie Boyd supported by at excellent company will great if or the first time in Portion the splendid play of His Natural life. The play will be produced during the week breaking of this july in exchange pays it the following templanear.

A large audience greeted the first appear ance of His Natural life and a general vertice of well done was rendered with enthusiasm at several points and at the close of the performance. The plot is an exciming one and was very lineary worked out Charles Man burs as the suffering hero at once became popular and lais every inversent was so litting and remarkably striking as to keep the interest at its height Mays Bood as an advanturess did not occupy the stage in many inaportant or lengthy parts but she bore herself at all times with finished grace and expression and has well received Into being Ferfell the aut or of the play in the character of a faithful old servant was a splendid conception his impersonation in voit and action being faulities. Miss Antine Millin as the angelic child and trusting your gwoman, became a great favorie and sustained her part excellently. The whole trouper is a strong combination and its entertainment is first class. A grand tableau was presented at the close of the second act. The toracle in the Southern Occam, a score in which the occupants of a small bout in terrible distress behold a shiply which firstly comes to their rescue. The effect is time.

Return of the Rev John W. Sellwood From the Sandwich Islands.

Cives a Reporter Same of His Views and Impressions of That Land of Peren nial Sunshine

Rev John W Sellwood rector of St David's church in Last Portland and wife returned from their "ojourn umong the Sandwich islands Saturday forenoon Neurry ax months ago Rev Mr Sellwood took leave of his flock in East Portland and with the many well wishes of his friends sailed for the bandwich islands, there to resi and recuperate his health which from hard labor had become somewhat schoolly im He now returns with the flush of health

on his cheeks and feeing as he says much better and stronger than valenche lett. Most of Rev Sollwood's time was spent at Hono-iulu the leading city of the island 10 an Oras ostars report in the gives a very interesting account of his travels the resources of the islands and the manners and habits of the people.

Honolula has a population of some 20 000

hostics of the slands and the manners and hosts of the people

Honolula has a population of some 90 900. Of these only about 3000 are whites the rist being divided among the natives. Chiacse and Portuguese. The Chimise are last getting into all of the trades and already own most of the stores.

They are so fixt monopolizing the busiaess of the city that the natives now have a folion in the legislature to amend the constitution so that the heavy Chinese immigration may be stopped. The natives are opposed to this influx of thinamen and consider than a detriment to the country.

The city is laid out beautifully. The streets lined with well kept shade frees are not an idean. All manner of most beautiful typical flowers adorn the doory ards and gardens. The date paim roy all paim umbrella patm and in fact all varieties of the paim grow in the most charming and pictures que imaginable. From Pilia splendid view is obtained of the surrounding country for miles in all directions. The towering volceno of k lanea here is in plainy new and a most maposing gith it is. The volcano now is in a state of constant activity and there is no more Lacehating diversion for a strang rithm to sit down in some one in the surroundid structure of the half wash the snocke beled forth from out of its viwing crater.

The rier dress nearly the same as the whies while the women use a dress that too might be an adapta ton of a rectume vorm on some one isson by the peculiary is their, women of this coin try. Their principal dress is a griment called holoka and is fushioned after the robe known by the women of this country as he Mother Hubbard. As the we there is warm it all seasons of the year it makes a very confortible furnish. Shoes are worn but very little.

THEN HALL ARTICLE OF FOOD The 'riscipal food of the natives is made out of a sort of a root called taro. This is a very common plant and furnishes food with out much inhor being expended in the cultivation of it. The root is pointed up into a pulp and then baked making a kind of a pastry called pol. This is the bandwich islanders staff of the One acre of this taro supplies an average family with food for a year. In ad hinou to this por the people ent a great deal of fish. There are a great many lish of all kinds caught in the waters alorg the const and a staple article of food they make.

Sugar is be most important commercial commodity raised on the islands. I here are many large plantations and hundreds of Portuguest and Chinese are emposed. All the sugar is sent to the refineries in Cali forms. Bananas mangos and pineapples are the most extensively raised fronts of commerce and large quantities are exported to this country. The domestic animals on the islands present a fine well fed appear ance. Meet of the cattle are Holsten Jer seys. Durhams or other breeds of thorough bred stock. There is only one drawback to raising stock on a large scale and that is the scarcity af tood. At present all the hay outs and other kinds of feed are imported from California.

The bandwich islands are fast rising into commercial importance. Their resources are being developed and improvements are being pushed in all directions. A good many conveniences of civilized society such as electric lights and telephones are stready in use. Here is a fine of civilorad on the islands if it was and a franchise has recently been granted to a company to build a road connecting Honolulu with Ferri harbor. PRODUCTS OF THE ISLAND

ABO T THE CLIMATE 11 c temperature of the Sandwich islands to the variety of the Sandwich islands is very cive. There is scarcely any virtation in the thermometer between day and hight and between the different seasons. The climat is mild and to an invalid energating and still refreshing. Among the motuating there are some very fue focustions for a samitarium.

One thing that is not known among the people of the contails world is the remarkable more ase of lepron. This natives are fast duing of with this dreadful and loathsome diseast. I very effort is made to separate the afflicted from the rest of the community but with only a small degree of success. The natives are not afraid of the disease and when any of their number contract it they enduavor to keep the matter secret and from the knowledge of the authorities. As quick as the lepers are discovered they are taken to the island of Molokat where a large hospital is maintained. They here receive the best of take and everything is done to make them as comfortable as possible. At present the hospital contains between 800 and 900 inmates in all stages of decay and disease. It is estimated that at least as many more are at large add concealed by relatives and friends. Here is a receiving hospital at Homolufu where lepers are brought from all parts of the relands. There is no danger to be apprehended by people visiting the islands for the disease contagnous only by coming in personal contact with those afflicted. All that is necessing its to exercise proper care in avolding contact. Hundreds of people visit the islands every year vet a case of leprosy among the whites is scarcely heard of Among the Portland people met by Rev and Mrs. Sellwood were Mrs. Goo. W.
